

# Angel FX

E.A.D.L. / E.C.U.

Welcome to **Control Nirvana**. At Angel ECU, we believe there is nothing more important than becoming independent. You are looking at the only system made that can truly take you there. The Angel FX ECU was developed by focusing on human need, and striving for excellence. Quality, Flexibility, Performance, and Ease of Use are the attributes that Angel FX has been built upon. We then added an arsenal of intelligently designed features to take it beyond the next level. Whatever your control needs may be, you can rest assured that Angel FX can handle the job with ease.

**[Discover a higher level of Independence...](#)**

**[Discover Angel ECU](#)**

- Ceiling Fans & Portable Fans
- Cameras & Video Surveillance Equipment
- Door Access & Openers
- Garage Door Openers
- Shade Control Units, and Window Openers
- Page Turning Devices
- Personal Computer (with optional card)

My life has changed dramatically since I purchased an Angel FX ECU! I am a C3 quad, and am not able to use my hands, arms or legs. For many years, I have been completely dependent on my mother for every little thing, it has been terrible. But, now that I have the Angel FX ECU, I have regained some privacy, some confidence, and a whole lot of Independence. This machine does it all! I feel like I am back in control of my life! And my poor mother is thankful also, what a relief for her. Thank you Angel ECU for building such an awesome system, I am forever grateful.

– P.T., Hollywood, FL

Our goal, at Angel ECU, is to make you independent once again, no matter how severe the disability. Our people possess the skills and experience to help you overcome any obstacle. Our products have been engineered keeping your needs in mind, and offer the best variety of features, capabilities and performance that you will find anywhere. Our model FX ECU possesses many creative features that are unique to Angel ECU. Such as our ability to control equipment that may be located in other rooms of your home via our optional **I/OPOD** peripheral device.

## I/OPOD — Input Output Port Origination Device

This ingenious device adds additional resources to an FX ECU, allowing you to control much more than ordinary ECUs. Several of these optional devices can be added to a single FX system to allow control of various equipment and devices throughout the home. The I/OPOD is also available in a wireless version for the ultimate in flexibility!

## Extraordinary Communications Features...

...Keep you in touch with loved ones, and the world. Angel FX boasts a built in Speakerphone with a 1,000 number contact directory. It displays Caller I.D., And stores a history of the last 1,000 callers. Caller I.D. Callback allows you to return calls to previous callers effortlessly. **Are you unable to write down a phone number?** Angel FX can capture any phone number and automatically save it in your contact directory. Automatic muting of your TV and Stereo is an option upon answering a Telephone Call. Automatic Telephone Answering & Disconnect allows loved ones to check in on the user, without any action required from the user to answer the phone. Connect wireless, or wired headsets to talk privately if desired. "Simple Telephone Mode" makes using the phone "child's play" for those customers where the "less is more" concept is most appropriate.

## Control it by VOICE from your wheel chair...

## VR-2

The VR-2 wireless Voice Recognition module allows you to control elements of your environment with simple voice commands. This module is small and light weight and will operate for 10 hours on a charge thanks to the built-in LiPo battery. The VR-2 also allows you to plug a switch input device into it, and can send switch signals back to the FX ECU in case you feel like controlling the ECU via switch input. The wireless range is up to 1200 feet.

**FX ECU systems start at \$6,200.00**
